INTRODUCTION

The placement portal basically provides three interfaces
- One for the admin to keep track of the companies coming for recruitment, the ongoing recruitments, and the completed ones,, and also the student database
- One for the recruiters to register and update the online test and interview timings;the list of students who have applied for the company and the ones shortlisted for interview and the ones who have accepted the offer.
- One for the students to view the ongoing recruitments and those that are open to that particular student and to apply for them; and to stay updated about the timing of ots and interviews.

Languages used

Frontend- HTML,CSS

Backend- PHP

Database- MySQL
